45 YEARS OF EXPERIENCE

For three generations the Tonoli family has been an active part of the Italian industrial community; entrepreneurship devoted to quality and customer satisfaction. 40 years of history made of commitment, challenges and successes have made Tonoli the esteemed company it is today.

A modern organization guided by principles and values. Starting as an artisan company, it developed and improved to become the Tonoli Group, represented today by 4 companies that are points of reference in their own industrial sector.

THE HEADQUARTER

OUR HEADQUARTER IS LOCATED IN BRESCIA, ONE OF THE MOST TECHNOLOGICAL, INNOVATIVE AND PRODUCTIVE AREA IN ITALY. OUR MODERN FACILITIES PROVIDE THE FLEXIBILITY THAT ENABLE US TO HANDLE VARIOUS TYPES OF MANUFACTURING.

TONOLI IMPIANTI

DAL 1980

It is the first company of the group, founded in 1980 by Gianfranco Tonoli who passed on passion and knowledge to his sons Giancarlo and Andrea and subsequently to his 3 grandchildren. Today, led by Pierpaolo Tonoli, the company boasts in-depth knowledge in the manufacturing of process and service cranes, with countless applications in different sectors.

Tonoli Impianti produces various types of machinery, also based on customer design, totally customizable for every type of need. Modern production techniques and long experience guarantee a product of the highest quality.

T-CRANES

For hangar/military equipment/steel works.

T-CART

Overhead trolleys are a cheaper solution than the wheeled self-propelled vehicles.

T-CAB

Standard control cabins designed to be easily installed on any type of overhead crane.

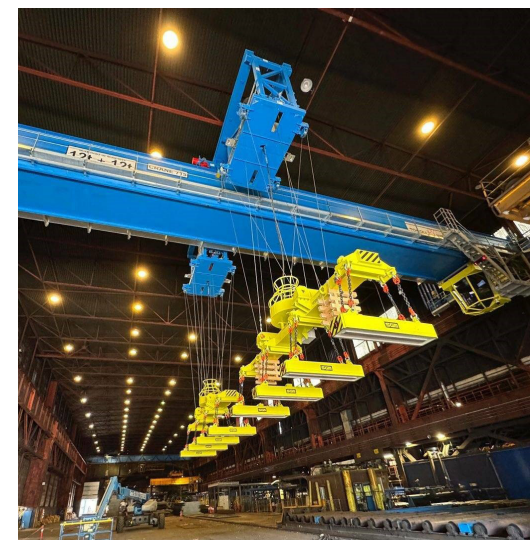

T-CRAB

It is made up of a metal structure; it runs on 4 rubber steering wheels and is completely electric; a valid solution for those who need to move loads of all types in large outdoor yards.

TONOLI IMPIANTI

DAL 1980

MECCANICA
CENTER

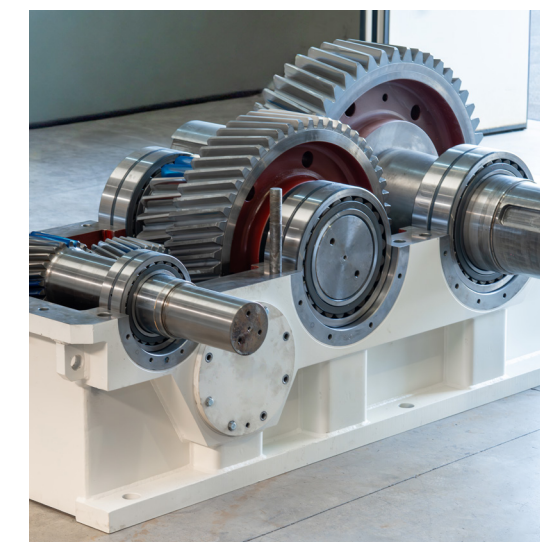

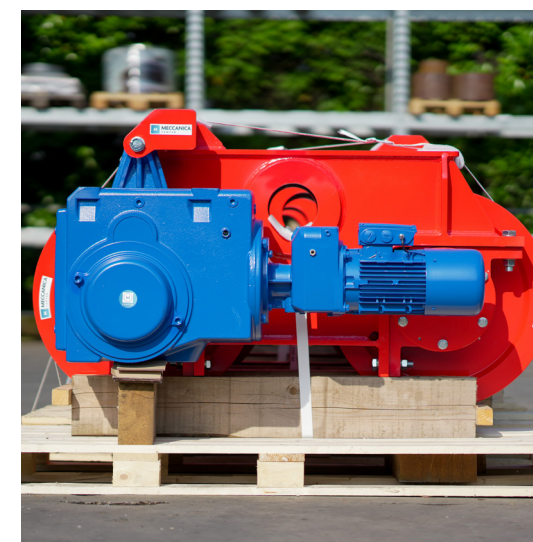

Specialized in the production, processing, assembly and testing of components for lifting equipment, Meccanica Center is a fundamental partner in the steel sector, for which it produces spare parts and components for machinery, combined with revamping and reverse engineering services.

100% made in Italy; production of wheels, pulleys, drums, guide rollers, hook blocks, gearboxes, all together with the fabrication of special steel components and equipment.

But it is in the “FIRMA” wheel, the company’s flagship, where we find the maximum expression of the company’s key principles: “QUALITY, TECHNOLOGY, EFFICIENCY”.

The “FIRMA” wheel is the result of years of research, dedication and improvement: specific know-how that has allowed us to shape the ideal component for the main applications and therefore to guarantee maximum efficiency of overhead cranes, harbour cranes, trolleys and special machines.

Safety that translates into tangible savings in maintenance and plant downtime.

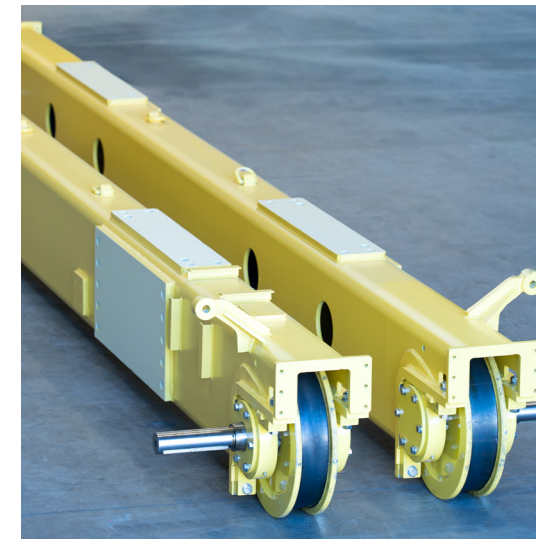

Carpenteria Meccanica Tonoli specializes in the production of machined metal structures for the lifting industry. We offer a complete service, from design and engineering to the final assembly of mechanical and electrical components.

Specializing in the steel industry, we thrive where standard products reach their limits by supplying tailored lifting solutions and sturdy TX Winch Crabs engineered for severe environments and stringent specifications.

Our goal is to provide customers with “ready-to-mount” kits, including custom hoists/ winches, end-carriages with wheel groups, and integrated electrical panels.

These are provided with full technical documentation designed to simplify the assembly and integration process while giving clients complete management of their structural parts.

Immobiliare Tonoli is a real estate company specializing in real estate investments. It engages in the purchase, construction, and renovation of properties, with the goal of enhancing their value and securing their resale potential.

The company stands out for its management and development of real estate projects, adopting a strategic approach aimed at increasing asset value and maximizing investment returns.
